DETAILED ACTION

This Office Action is responsive to communications filed on July 14, 2000.

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 15-19, drawn to a method for changing a reserved capacity for a given channel, classified in class 370, subclass 468.
 - II. Claim 14, drawn to a method of selecting a path from a source node to a destination node, classified in class 370, subclass 351.
2. Inventions I and II are related as subcombinations disclosed as usable together in a combination. Inventions in this relationship are distinct if it can be shown that (a) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (b) that the subcombination has utility by itself or in other combinations. In the instant case, inventions I and II have separate utilities such as invention I teaches a capacity management method and invention II teaches a path selection method not requiring capacity management. See MPEP §806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2661

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
